

Bank Builder Pro™

Employee Bank Automation

- Self-service Employee Bank-Building
- High-capacity Cash & Coin Recycling
- Transit Cassette Limits Cash Exposure
- Continuous Feed, High-Speed Input
- Automatically Audit or Drop Entire Machine
- Reduces Labor Costs
- Twelve Notes per Second

A Modern Solution For Automating Employee Banks and Tills

Bank Builder Pro is the most progressive cash recycling solution for managing and creating employee banks. Bank Builder Pro maximizes employee productivity and provides real-time auditing by automating both ends of the bank-building process.

Developed with the best-in-class hardware and powered by Passport's proprietary LiveCage software, Bank Builder Pro reduces overhead and enables employees to spend more time creating great patron experiences.

REDUCE BANK BUILDING TIMES

Increases employee efficiency by eliminating till preparation and deposit verification processes at the beginning and end of shifts.

LIMITS CASH EXPOSURE

External transit cassette reduces cash exposure when cash is moved or during self-audits.

EASY MANAGEMENT

Centralized administrative portal for quick access to reports and management.

ADVANCED TRANSIT CASSETTE

Add or remove cash and audits without ever opening the safe. Experience continuous feed that distributes at 12 notes per second.

High-Capacity, High-Efficiency Cash Management

Bank Builder Pro brings next-level efficiency to your back of the house by providing employees with self-service cash management and reporting solutions. Supervisors can preprogram multiple bank configurations for job types or specific employees through a centralized administrative portal, check floats, run reports, and view transactions. Employees log in to their pre-registered accounts for shift withdrawal and end-of-shift deposits.

The Bank Builder Pro note recycler is the most advanced high-capacity recycler designed to handle the demands of the most prominent properties or heavily trafficked locations, all in a compact footprint. Bank Builder Pro minimizes cash exposure by introducing the industry's first-of-its-kind transit cassette and self-auditing capabilities with a 13,800 note total capacity dispenser for expedited transactions.

Benefits

- Greatly reduces labor costs
- Expedites employee bank-building
- Significantly increases count accuracy
- Self-auditing capabilities without cash exposure
- External transit cassette reduces cash exposure
- Centralized management and reporting from LiveCage™ Web
- Banks can be deposited at any recycler station
