

OmniStream™

Full-Service Redemption Kiosk

Built for high-traffic gaming environments, OmniStream™ combines modern design with reliable performance to deliver a seamless cash access experience for both players and operators.

Why OmniStream™

- Multiple transactions in one kiosk, including ticket redemption, ATM access, bill breaking, and more
- Dual 27-inch displays designed for strong casino floor visibility
- Flexible bill mix capabilities for optimized currency management
- PCI-compliant hardware backed by nationwide support

LiveOffice™

Real Time Kiosk Management

With greater visibility and control, LiveOffice™ helps keep kiosks running efficiently while reducing downtime and improving overall floor performance.

Why LiveOffice™

- Real-time monitoring of Passport kiosks across the casino floor
- Remote servicing tools that help resolve issues quickly
- Dashboard-style analytics for clear operational insights
- SMS and email alerts that notify staff of important activity

Pay@Play™

Cash Access At The Table

Designed to keep gameplay moving, Pay@Play™ delivers a secure and convenient payment experience for both players and operators.

Why Pay@Play™

- Purchase chips or receive payouts instantly using PIN-based debit cards
- Support for CashLoop™ digital wallet for expanded funding options
- Portable payment device designed for privacy and seamless table gameplay
- Integrated reporting and compliance through Passport IQ® and Guardian Pro Premier™

DataStream®

Secure Transaction Processing

With cloud based infrastructure and robust monitoring tools, DataStream® helps operators manage transactions, monitor activity, and maintain secure payment processing across their operations.

Why DataStream®

- Secure processing for ATM, POS, ACH, and retail transactions
- Real time transaction monitoring through desktop and mobile reporting tools
- PCI compliant infrastructure designed for secure and reliable processing
- Dynamic pricing capabilities integrated with Passport's CashSuite platform

LiveCage[®]

Casino Cage Automation

With real-time reporting and centralized monitoring tools, LiveCage[®] gives operators better visibility into cage activity while allowing staff to focus on delivering a smoother guest experience.

Why LiveCage[®]

- Automated cash handling that speeds up cage transactions
- Reduced variances and improved accuracy in cashier operations
- Real-time reporting and centralized cage monitoring
- Seamless integration with existing casino systems
- Compact under-counter design built for casino cage environments

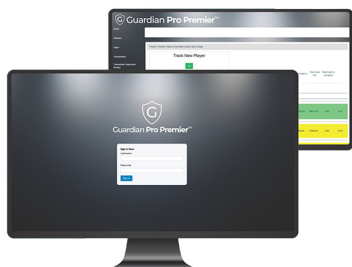

Bank Builder Pro[™]

Casino Cash & Coin Recycling

Designed to increase efficiency and reduce manual handling, Bank Builder Pro[™] helps casino teams manage cash more effectively while freeing staff to focus on delivering a better guest experience.

Why Bank Builder Pro[™]

- Automated cash and coin recycling for faster bank preparation
- Improved accuracy and reduced manual cash handling
- Real-time auditing and reporting through LiveCage[®] integration

Guardian Pro Premier[™]

AML And Title 31 Compliance Platform

By connecting with casino management systems and payment platforms, Guardian Pro Premier[™] provides compliance teams with the insights and automation needed to meet regulatory requirements efficiently.

Why Guardian Pro Premier[™]

- AI-driven player identity verification and compliance monitoring
- Automated Title 31 and AML reporting with FinCEN filing support
- Real-time monitoring of reportable player transactions
- Centralized compliance profiles and analytics across casino systems

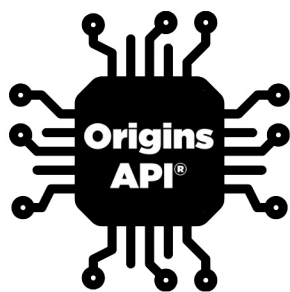

Origins™ Gamified Casino Loyalty Platform

With powerful campaign tools and real-time insights, Origins™ allows casino marketing teams to build stronger player relationships while simplifying loyalty program management.

Why Origins™

- Gamified loyalty experiences, including interactive games and reward-based promotions
- AI-driven campaigns that personalize offers and promotions in real time
- Seamless integration with casino management systems and player data
- Intuitive dashboard for managing promotions, rewards, and engagement programs

Origins API™ Resort System Integration Platform

By connecting systems across the property, Origins API™ helps operators deliver more personalized guest experiences and real-time engagement opportunities.

Why Origins API®

- Connect loyalty programs with retail, food and beverage, hotel, and resort systems
- Flexible API architecture designed for seamless third-party integrations
- Real-time data exchange to support personalized guest engagement
- Built to support the full Origins™ ecosystem

CashLoop® Casino Digital Wallet

By expanding cash access touchpoints and reducing reliance on physical cash, CashLoop® helps casinos improve player convenience while supporting a modern cashless gaming experience.

Why CashLoop®

- Seamless integration with kiosks, cage systems, and gaming platforms
- Reduces lines at the cage and kiosks by expanding cash access points
- Supports loyalty engagement, rewards redemption, and responsible gaming features
