Automated cash handling at the Cage featuring PCD Pro & PCD XL

Delivering unrivaled automated cash handling at the Cage, LiveCage® streamlines the cash payout process for faster and more accurate transactions.

LiveCage® powers cashier drawers, increasing staff efficiency, reducing variances, and providing cashiers with the time to create a better patron experience.

ANNUAL LABOR SAVINGS

LiveCage®'s kiosk automates the cashier process to speed up every shift change.

STREAMLINE PAYOUT PROCESS

LiveCage® enables faster, more accurate transactions and payouts at the Casino Cage.

REDUCES VARIANCES

LiveCage®'s automated process reduces variances to near-zero.

ENHANCED SECURITY

LiveCage®'s cash vault and cassette swaps deliver higher levels of cash security.

High-Capacity, High-Efficiency Cash Management

Passport's proprietary data capture module allows transactions to be displayed from any software, capturing transaction details without manual cashier intervention. Combined with a powerful Cage reconciliation and reporting back office, LiveCage® optimizes cash inventory with real-time reporting of all cash transactions for the Cage.

LiveCage®'s intuitive centralized portal enables real-time reporting, terminal management and configuration, transaction and audit reports, and cash and uptime monitoring. With simple transaction configuration and user management, properties can customize the solution to fit specific reporting and user needs.

Features

- Significant annual labor savings
- Streamlines payout of all Cage transactions
- Reduced patron wait times and improved experience
- Variances reduced to near-zero
- Enhanced security (vaulted cash, cassette swaps, no counting in or out)
- Enhanced cashier-patron interactions
- The efficient design fits under most existing counters
- Optimize overall cash inventory
- Fully manages and reports all active cash for the Cage
